Groveland, FL | 321-368-3234 | giovannimaldonado07@gmail.com
linkedin.com/in/giovannimaldonadovelez | github.com/giovannimv07 | giovannimv.vercel.app
Software Engineer | Computer Engineer | Full-Stack Developer

PROFESSIONAL SUMMARY

Computer Engineering graduate from the University of Central Florida with hands-on experience in full-stack development, embedded systems, and low-voltage network infrastructure. Proven ability to design and ship cross-platform applications end-to-end, from RESTful API design and database architecture to Flutter mobile frontends and React web interfaces. Practical exposure to network protocols (TCP, UDP, I2C, UART) and physical infrastructure (Cat6, access control, IP cameras) bridges software and networking disciplines. Bilingual in English and Spanish, with a strong record of collaborative delivery in Agile environments.

TECHNICAL SKILLS

Languages	C, Java, Python, Dart, JavaScript, PHP, SQL, HTML/CSS
Frameworks	Flutter, React.js, Angular, Node.js, Express.js
Databases	MongoDB, MySQL
Protocols	TCP/IP, UDP, I2C, UART, REST, HTTP
Networking	Cat6 structured cabling, access control systems, IP cameras, low-voltage systems
Dev Tools	Git, GitHub, VS Code, Eclipse, MySQL Workbench, Arduino IDE
Spoken	English (Fluent), Spanish (Fluent)

PROFESSIONAL EXPERIENCE

RDB Energy Solutions

Quality Control Technician / Warehouse Manager / Scheduling Lead

Orlando, FL
Aug 2025 – May 2026

- Took over technician scheduling and project coordination after PM departure.
- Led quality control and warehouse operations across multiple active sites.
- Reviewed technical blueprints and proposals for errors and missing items.
- Managed service tickets and handled minor sites projects end-to-end.

RDB Energy Solutions

Low Voltage Technician

Orlando, FL
May 2025 – Aug 2025

- Installed and maintained low voltage systems across commercial and multifamily sites.
- Collaborated with projects teams on technical installations and field work.

Universal Orlando Studios

Team Leader, Park Services

Orlando, FL
Jul 2017 – Jan 2023

- Led and coordinated a team of six, optimizing daily scheduling and resource allocation to consistently meet operational targets within budget constraints.
- Served as a first-line problem solver for operational and team challenges, applying structured analytical thinking transferable to software debugging and systems troubleshooting.
- Recognized for consistent leadership excellence with the Bravo Award and multiple Team Leader of the Month distinctions across a 5-year tenure.

PROJECTS & ACADEMIC WORK

Optical Chlorine Concentration Analyzer | Flutter, Node.js, Arduino, UDP

2024

- Architected and built a full-stack mobile application to enable real-time remote monitoring of chlorine concentration in water samples, integrating hardware sensor input with a polished mobile UI.
- Implemented UDP communication between a Node.js backend server and an Arduino Uno WiFi Rev2, achieving low-latency data transmission for live sensor readings at the hardware-software boundary.
- Designed data processing pipelines to collect, parse, and visualize sensor measurements, improving application accuracy and responsiveness in a resource-constrained embedded environment.

Bite By Byte | Flutter, React.js, Node.js, Express, MongoDB (MERN)

2024

- Served as Back-End Lead on a Duolingo-style cooking education app, architecting the full MERN stack backend, including RESTful API design and MongoDB schema to support scalable, dynamic content delivery.

- Built cross-platform frontends in Flutter (mobile) and React.js (web), delivering a consistent and responsive user experience across iOS, Android, and browser environments.
 - Collaborated in an Agile team environment using Git and GitHub for version control, code review workflows, and coordinated feature releases.
- Purrfect Contacts** | *PHP, MySQL, Apache, Linux (LAMP Stack)* 2024
- Served as Back-End Lead, designing and implementing a PHP-based REST API for a contact management system, including user authentication, CRUD operations, and secure session handling.
 - Optimized MySQL database schema and query performance for efficient, scalable data retrieval, applying normalization principles and indexing strategies.

EDUCATION

University of Central Florida *Orlando, FL*
Bachelor of Science, Computer Engineering | 2024

Valencia College *Orlando, FL*
Associate of Arts, General Studies | 2021
